## The Endothelins

**endogenous endothelins and nitric oxide in hypoxic ...** - constrictor effect of endogenous endothelins appears related, at least in part, to the release of nitric oxide (no) by the endothelium, which either counteracts the effect and/or inhibits the synthesis of endothelins [16-19]. endothelins have been hypothesised to play a role in the mediation of hypoxic pulmonary vasoconstriction (hpv). **endothelins: their current status and future prospects** - endothelins have also been implicated in restenosis after percutaneous coronary angioplasties or stent implantation.7 by inducing some structural changes; endothelins have been suggested to have a role in bronchial asthma and chronic obstructive pulmonary disease.7endothelins are being studied as a marker of **endothelins implicated in referred mechanical hyperalgesia ...** - endothelins implicated in referred mechanical hyperalgesia associated with colitis induced by tnbs in mice1 rafaela franco claudino, rodrigo marcon, allisson freire bento, juliana geremias chichorro, and giles alexander rae abstract: this study evaluated the contribution of endothelins to changes in sensitivity to mechanical stimulation of the **endothelins in the normal and diseased kidney - ajkd** - endothelins in the normal and diseased kidney donald e. kohan, md, phd • endothelin-1 (et-1) is a 21-amino acid peptide that potently modulates renal function. et-1 produced by, and binds to, most renal cell types. et-1 exerts a wide range of biologic effects in the kidney, including constriction **endothelins: vasoconstrictor effects and localization in ...** - endothelins have been shown in porcine coronary arteries, it is not known whether or not there is a qualitative difference in the vasoconstrictor mechanism of these peptides. endothelin-1 causes a direct and sustained vasoconstriction of cerebral arteries from cats and dogs in vitro and in vivo **endothelin: 20 years from discovery to therapy1** - endothelins and endothelin receptors et-1 is a 21-amino acid peptide with a hydrophobic c-terminus and 2 cysteine bridges at the n-terminus and is the main member of the endothelin peptide family (yanagisawa and masaki 1989). two structurally related peptides differing by 2 and 6 amino acids, termed et-2 **contractile effects of endothelins on isolated human ureter** - two endothelins were not investigated, and receptors for endothelins in human ureter were not characterized, leaving us without clear picture about role of endothelins in regulation of human ureter motility. the aim of our study was to investigate effects of endothelins 1, 2 and 3 on spontaneous activity, tone **influence of endothelins and sarafotoxin 6c and l-name on ...** - influence of endothelins and sarafotoxin 6c and l-name on renal vasoconstriction in the anaesthetized rat ljoanne l. marshall & \*,1edward j. johns 1department of physiology, the medical school, birmingham b15 2tt 1 an investigation was performed in pentobarbitone anaesthetized rats to compare the renal **effects of endothelins on signal transduction and ...** - the journal of biological chemistry vol. 266, no. 27, issue of september 25, pp. 18352-18357, 1991 (© 1991 by the american society for biochemistry and molecular biology, inc. printed in u. s.a. effects of endothelins on signal transduction and proliferation in human melanocytes\* (received for publication, february 21, 1991) yukihiro yada, kazuhiko higuchi, and genji imokawas **the role of endothelins in regulating bovine granulosa ...** - the role of endothelins in regulating bovine granulosa cell function. j. e. ervin, l. f. schultz and l. j. spicer. a. department of animal science, oklahoma state university, stillwater, ok 74078. summary & conclusions. steroidogenesis • both et-1 and et-2 inhibited estradiol production in a dose-dependent manner. **endothelins and endothelin receptor antagonists** - endothelins and endothelin receptor antagonists therapeutic considerations for a novel class of cardiovascular drugs thomas f. lu"sscher, md; matthias barton, md abstract—the 21-amino acid peptide endothelin-1 (et-1) is the predominant isoform of the endothelin peptide family, which includes et-2, et-3, and et-4. **effects of the dual endothelin receptor antagonist ...** - coxon rank test. all reported p values were two tailed. a p value 0.05 was considered statistically significant. data were expressed as mean sem, except for demographic and treatment **endothelin: a knockout in london - cell** - endothelins, particularly et-1, in a wide variety of disease states. the new generation of antagonists are now providing the tools necessary for the analysis of these roles. animal models endothelins are pro-mitogenic, hence one of the potential uses for endothelin receptor antagonists may **neuroendocrine actions of endothelins - cell** - endothelins are present in non-vascular tissues including neuronal, neuroendocrine and endocrine cells; and endothelins stimulate secretory responses in the hypothalamic-pituitary system and peripheral endocrine organs. this article reviews the distribution of endothelins and endothelin receptors within the
